

Financial ERP Implementations

1.1 Sage ACCPAC ERP implementation for a Major Steel Fabricator and Distributor

Project Highlights:

- Implement a complete ERP software solution addressing the special needs of heavy duty steel fabricator.
- Provide a process centric ERP approach to streamline their financial-process consolidation
- Enhance Budget Control and Management capabilities in tune with their business needs
- Provide an integrated reporting system to create and manage Dash Board information

Business Need:

The client is a global leader in the Steel business and has multiple facilities across the globe. To support the expansion they decided to invest in an ERP that integrates their operations and provide a common dash board for executive decision making. The ERP should integrate all functions locally and merge their global MIS system.

Solution:

Sage Accpac Financial ERP Software was implemented with integration to their production and Tax software for a holistic view of their businesses
Sage Accpac Financial ERP enhances control and provides information needed to make smart business decisions. With Sage Accpac Financial ERP it became simpler to produce a number of reports for the Board of Directors including profit loss, balance sheet and service level report.
